MCG Today

Behind the Lines...

This issue of **MCG Today** features the Inauguration of the fourth president of the Medical College, Dr. William H. Moretz. The Inauguration was a memorable and historic event in the life of MCG. It gave President Moretz an opportunity to express his views of the office and his hopes, plans and aspirations for Institutional advancement during his administration. Please read the Inaugural Address in which he outlines plans for the next ten years of development for the college.

We are pleased that many alumni were able to attend the Inaugural Convocation. The date, November 7, was chosen to be compatible with the schedule of the November meeting of the Board of Regents. If you were unable to be here on November 7, perhaps you will have the opportunity to ask questions and to react to the proposals and plans for future development.

The following are excerpts from some of the letters received from persons who attended the Inauguration:

Mrs. Luther B. Otken, president, Faculty Wives Club, "Throughout the entire workup of this vast undertaking, one thing was made very clear to me. . . the wonderful way the MCG family group can work together to create a successful happening when faced with a common goal."

A Resolution from the Board of Regents, ". . . much thought and planning by the administration, faculty and students of the College, and by other local officials and organizations, were given to providing a pleasant and rewarding visit by the Regents and staff to the Medical College on this important occasion."

Alfred Jay Bollet, M. D., Chairman, Department of Medicine, "I admired all the arrangements, decor, printed material. . . it was done with class and was exactly what we needed. . . "

Julian K. Quattlebaum, Sr., Board of Directors, Medical College of George Foundation, Inc., "It was a most delightful occasion. I feel that the medical school will far exceed Dr. Moretz's fondest expectations under his consummate leadership."

Hoke Wammock, M. D., Board of Trustees, Medical Alumni Association, "I want to take this opportunity to thank you and the members of your Inauguration Committee for developing such a fine program for what I deem to be perhaps one of the finest hours in the history of the Medical College of Georgia."

JCA

ON THE COVER — Chancellor George L. Simpson, Jr., places the Medallion and Chain of Office upon the shoulders of new MCG President William H. Moretz, M. D. during Nov. 7 inauguration ceremonies. Walter L. Shepeard, M. D., who along with Dr. Philip Dow was a Grand Marshal, assisted Chancellor Simpson with the Medallion and Chain of Office.

William H. Moretz, M.D.
The Inauguration of MCG's President

Dr. William H. Moretz was inaugurated as the fourth president of the Medical College of Georgia Nov. 7, 1972, in ceremonies central to a full day of Inaugural activities.

Chancellor of the University System of Georgia George L. Simpson Jr. officially proclaimed Dr. Moretz president of MCG and placed the newly created Medallion of Office upon his shoulders.

In his Inaugural address in the large auditorium at MCG the new president projected present plans for huge expansion programs designed to prepare for an enrollment of 4,000 students by 1982, including 800 medical students.

The entire text of Dr. Moretz's speech is printed in this edition of MCG Today.

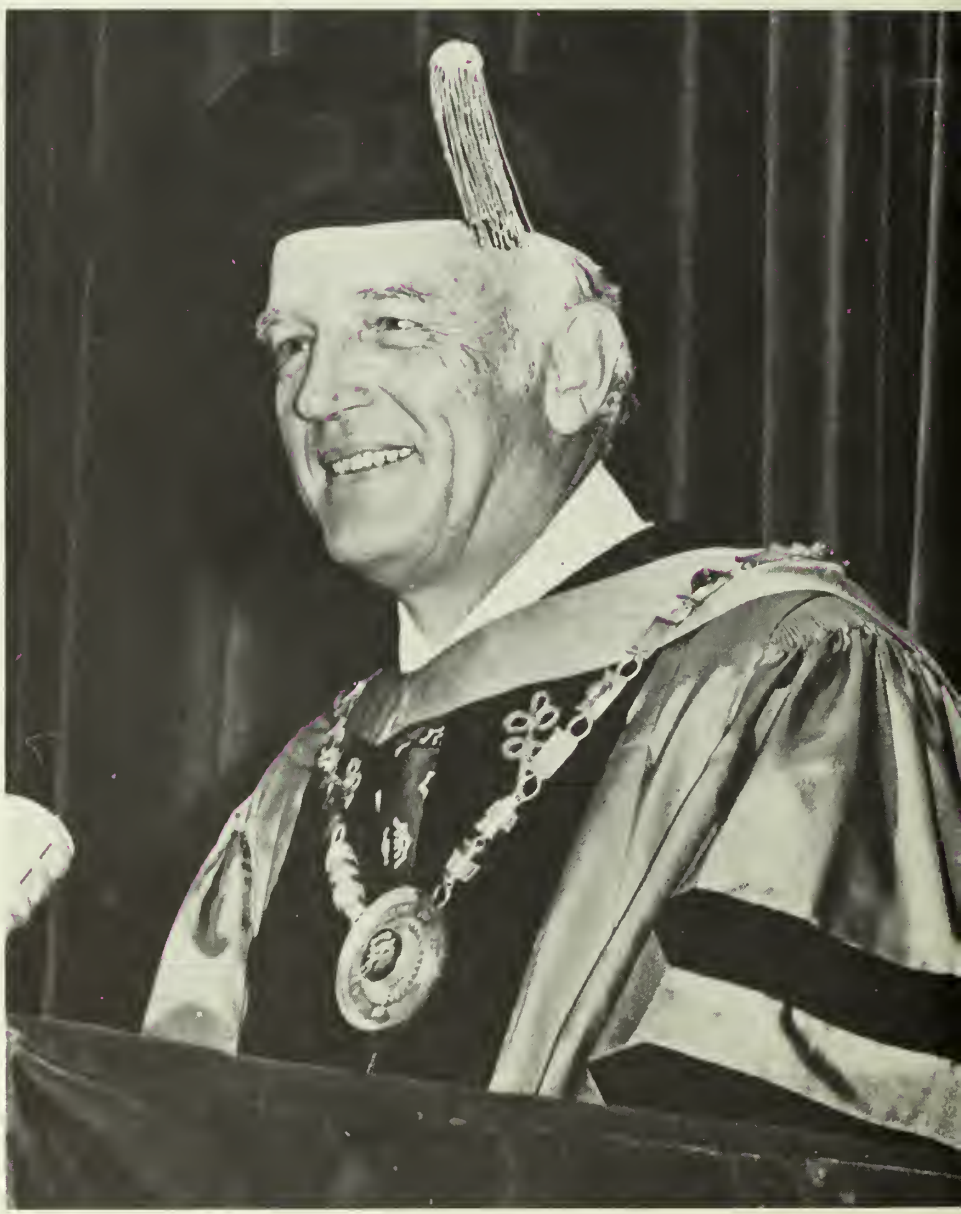
Dr. Daniel B. Sullivan, president of the medical alumni association, brought greetings on behalf of the alumni wishing for Dr. Moretz a long and productive future and offering to him the loyalty of alumni.

Others bringing greetings during the hour-long ceremony were W. Lee Burge, chairman of the Board of Regents, speaking for both the Board and for the State of Georgia; Dr. Sam A. Singal for the faculty, Douglas P. Clepper for the students and Mayor Millard A. Beckum for the City of Augusta.

Marshals for the procession were Dr. Phillip Dow, professor emeritus, physiology, and Dr. Walter L. Shepherd, professor emeritus, laboratory medicine. Nearly 100 different educational institutions in this nation and from abroad were represented among the more than 170 college presidents and MCG faculty members in the Inaugural procession.

The Inauguration schedule included a Nov. 7 luncheon at the Old Medical College, a 2 p.m. meeting of the Board of Regents, the convocation followed by a student center reception and later in the evening a formal Inaugural dinner and reception at the Pinnacle Club.

The following day the Board of Regents held their regular monthly meeting.



AL COLLEGE OF GEORGIA

"We accept the challenge to meet the health care needs of all the people of Georgia"

Inaugural Address
William H. Moretz, MD
Fourth President
Medical College of Georgia
3:30 p.m.
November 7, 1972
Large Auditorium

Chancellor Simpson, Mr. Burge, Mayor Beckum, distinguished guests, ladies and gentlemen: Welcome to the Medical College of Georgia. I am very grateful to each of you for being with us today. I know, that for many of you, being here is at considerable personal inconvenience, due to the distance you have had to travel and due to the conflict with Election Day.

A very special welcome to those of you who are watching these proceedings via closed circuit television, and my special thanks are extended for your willingness to allow our faculty and our special guests to be seated in this main auditorium. This true hospitality is deeply appreciated.

For me, your new President, and my family, this is truly a memorable day, one which we will cherish for as long as we live.

I assume that you now wish to hear all about our plans for the future. But it would be inappropriate for me to sketch these new vistas without first stopping to recall some of the past, especially those men whose labors made the present possible.

Since 1828, the Medical College has been training Georgia's health professionals. We and the State of Georgia owe an immeasurable debt to such founding fathers as Doctors Milton Antony, Joseph Adams Eve, Paul Eve, L. A. Dugas, and Louis B. Ford. These visionary leaders and those who followed them were responsible for making profound decisions affecting the future destiny of the institution. From these early periods of uncertainty, several actions may be identified as being of cardinal importance in reaching our present status. The first benchmark for this quick overview of our institutional heritage was in 1909 when Dr. Abraham Flexner of the Carnegie Foundation visited our campus. Dr. Flexner's visit to the nation's then 155 medical schools resulted in the closing of 35 of these institutions, and the Medical College of Georgia was one institution that narrowly avoided extinction. Dr. William H. Doughty, Jr., who became dean in 1910, has been credited by historians as the moving force in maintaining our accreditation. His plan brought the Medical College, its faculty, and students, and new facilities, to a new site very near to our present location. Alumni and involved citizens and leaders of Augusta arose to defend the location of the College here in Augusta, successfully opposing a Flexner recommendation that we be consolidated with an Atlanta medical school and moved to Athens. Dr. Doughty's efforts resulted in increased entrance requirements, improved physical facilities, and laboratories, and better clinical instruction. He was later, in 1911, instrumental in affiliating the Medical College with the University of Georgia at Athens, as the Medical Department of the University of Georgia.

In 1934, in response to a serious threat to accreditation, Dr. G. Lombard Kelly, then Acting Dean, and who died just two weeks ago (Oct. 24, 1972), obtained a bill of particulars and set about to correct the deficiencies and restore institutional accreditation. In doing so, he provided the positive leadership which began a new philosophy which ushered in the Medical College's "Modern Era".

His accomplishments included a successful financial campaign, a complete reorganization of the faculty with the addition of full-time faculty members in the basic sciences, and the selling of the concept, and the initial planning of it — Eugene Talmadge Memorial Hospital. It was not coincidence that it was during

Dr. Kelly's leadership that two modern giants were added to the faculty, the revered Doctors Virgil P. Sydenstricker in Medicine and William F. Hamilton in Physiology.

It was during this period also that Georgia's institutions of higher education were organized under a Board of Regents of the University System of Georgia. This University System is a prototype for excellence in the administration of public higher education, a model emulated by other states, and a major factor in the subsequent development of the Medical College of Georgia.

In 1950, the Regents granted the institution independent status in the University System and restored the name, "The Medical College of Geogia". Dr. Kelly became the first president and served in that capacity until 1953.

He was succeeded by Dr. Edgar R. Pund who served from 1953 to 1958. Dr. Pund consolidated, and firmed up, the work begun by Dr. Kelly, with conversion of the clinical, part-time faculty to "full-time status". These were also "trying times" requiring wisdom, understanding, and perserverance to overcome the problems related to this change in faculty status and to the building and opening (in 1956) of the Eugene Talmadge Memorial Hospital, the College's first wholly owned and operated teaching hospital. Having arrived during Dr. Pund's administration, I remember him as being uniquely suited for leadership at that point in our history.

It was in the Pund adminstration also that the Medical College of Georgia Foundation, Inc. came into being. This Foundation which receives gifts from alumni, friends, corporations, and foundations for application in areas inappropriate for, or incompletely supported by state funds, has become a vital instrument in the enrichment of our College.

Today, this vibrant and expanding university is poised at the edge of a new era in health education in Georgia. The man who succeeded Dr. Pund in 1958 and guided us to this threshold of impending greatness is with us today: our Vice-Chancellor for Health Affairs, Dr. Harry B. O'Rear — my esteemed predecessor. Building on the principle begun in 1953 with the move of the School of Nursing from Athens to Augusta, he conceptualized and reinforced the institution's role as a health university. He did this through strengthening and expansion of the School of Nursing and the School of Graduate Studies, through the establishment of the School of Dentistry, and by the consolidation of a variety of programs into the School of Allied Health Sciences.

His administration saw expansion of the campus through land acquisition, the initiation of many new programs, and a monumental building program, both in faculty strength and physical facilities. Dr. O'Rear led this institution from a relatively small but proud medical school to a large and eminent health sciences university.

Since Chancellor Simpson has now placed this Medallion and Chain of Office on my shoulders, a quote from the former Secretary of the Department of Health, Education and Welfare, John W. Gardner, seems appropriate:

"Men can shape their institutions to suit their purposes — provided they are clear as to what those purposes are: and provided they are not too gravely afflicted with the diseases of which institutions die — complacency, myopia, and an unwillingness to choose."

Let me assure you, Mr. Chancellor, and all those who hear this message that neither I, nor those associated with me as responsible advocates for the future of this institution, will suffer from complacency, myopia, or an unwillingness to choose. We are too well versed in diagnosis to suffer such maladies. We shall not hesitate to prescribe, and to apply, the therapy which we deem essential for the wholesome welfare and prosperity of the Medical College of Georgia.

We accept the challenge to meet the health care needs of all the people of Georgia. We will exert all necessary efforts to provide health care workers in all fields, of such quality and in sufficient numbers, to meet the needs of Georgia. And in the process of thus serving Georgia, we shall witness the development, here in Augusta, of one of the most illustrious health education universities, not only in the South, but in the entire Nation.

To meet this challenge with vision, with courage, and even daring, certain imperatives must be recognized and must be implemented.

Within a period of ten years we must very significantly increase the number of health care professionals being graduated. In the School of Medicine, instead of 100 new physicians, 200 will graduate. In the School of Dentistry, instead of the 24 new dentists in our first graduating class next June, there will be 96. In the School of Nursing, instead of 57 new graduates, there will be 190. In the School of Allied Health Sciences, instead of 76 new graduates, there will be 500. In the School of Graduate Studies, instead of 23 new Biomedical Scientists, there will be 100.

In our program of postgraduate medical education — the internships and residencies — instead of the current 212 physicians and trainees,

continued next page

there will be 350.

The total enrollment today, in all the schools, is 1,650. This total will exceed 4,000 within this ten year period. And this number represents only the on-campus enrollment. Our off-campus activities must increase even more. In the area of continuing education, for example, the potential pool of 100,000 health professionals in Georgia must have access to continuing educational programs, many of which must be made available by this institution.

Clinical health care activities will be markedly increased in all areas. For example, the average daily census in the Talmadge Hospital will increase from the present 330 to about 600, and the visits to the hospital's outpatient areas will double from the present 80,000 per year to 160,000 per year.

The size of our faculty, now 440, must be increased to 900. To accommodate this "people expansion" there must be a corresponding "physical expansion", both in land and buildings. To have adequate room for these activities, the campus of the Medical College must be enlarged. Ultimately, our campus, excluding a narrow strip along Walton Way but including the new University Hospital and the new Veterans Administration Hospital, should include the entire area bounded by 15th Street on the West, Walton Way on the North, Railroad Avenue on the East and Wrightsboro Road on the South. The cost of acquiring the additional 32 acres will exceed nine million dollars.

We will build on this land. The new structures required within the next ten years will include an addition to the Library to make it a learning resource center, a much larger Student Center with appropriate expanded recreational facilities, an undergraduate education building, a building to house an institute for the study of human disease, a rehabilitation and physical medicine center, additional office space for faculty and administration, a building for physical plant operations, and parking structures to accommodate a minimum of 2700 additional automobiles. At 1972 values, the cost of these buildings will be somewhere between 80 and 120 million dollars.

Present projections also call for the expenditure of at least 12 to 15 million dollars for renovations of our teaching hospital, the Murphey Building, our educational building, the dental building, and our administration building.

It is perfectly obvious that to accomplish our mission, to be able to properly utilize these current and additional facilities, substantial increases in annual support will be required.

Our present annual operating budget is about $35 million. Forty per cent comes from sponsored operations, such as grants, and from institutional sources such as student fees and hospital income. The remaining 60 per cent — 21 million dollars — comes from the people of Georgia through the legislature and the Board of Regents.

By increasing our own efforts, we will be generating internally in 1982, not the current 40 per cent, but 55 per cent of the annual operating budget, and that the percentage of state support required will thereby be reduced from the current 60 per cent to 45 per cent.

By 1982, barring unforeseen national economic reverses, a very conservative projection is that our annual operating budget will be 140 million dollars. At that time, funds from sponsored operations are expected to reach 30 million dollars and internal income (hospital, student fees, etc.) is expected to reach 45 million dollars, thus accounting for a large portion ($75 million dollars or 54%) of our total operating budget for 1982.

Direct state support of the annual budget, although being reduced in percentage from the present 60 per cent to 45 per cent, must increase in actual amount from the present 21.9 million dollars to an anticipated 64 million dollars.

The remaining one million dollars will come through the MCG Foundation mentioned earlier: from the alumni, the people of Augusta and Richmond County, citizens of Georgia as individuals and friends, grateful patients, corporations, foundations, and others.

The foregoing projections reflect primarily increases related to currently ongoing programs but they also provide the means for developing some new programs.

New and developing technologies require the training of new health professionals to apply these new fields to medicine. Examples of these continually growing fields include radiation therapy technologists, nuclear medicine technologists, health systems engineers and analysts, biomedical engineers and biocommunication personnel which includes the medical librarian whose future role may well be devoted more to working with tapes, television and computer equipment than with traditional books.

Medicine has indeed become complex and the advantages of a health team concept in providing health care are becoming obvious. Our educational setting and objectives here at the Medical College lend themselves to developing and supporting the team concept. Two programs now being implemented — family practice and physician assistants — serve as a focal point for this effort. The health team must expand in

scope and will include the medical social scientist, the mental health professional, the clinical pharmacist, the environmental scientist and the worker in comparative medicine who is concerned with the role of animal diseases as they pertain to the health of man. The development of these programs, as my esteemed fellow Presidents from our sister institutions will recognize, provides a great opportunity for a most significant cooperative type of effort amongst our various institutions.

Finally an area of importance that I alluded to earlier should be viewed in the perspective of our future plans — research in the health sciences. Not only must we provide our students with the latest medical knowledge emerging from the efforts of basic and clinical investigators elsewhere, but we, as a medical university, must accept the obligation to continue to contribute our part to this new knowledge.

Our recently completed, magnificient, Research and Education Building, will allow us to expand our research efforts primarily in the basic sciences. We must, also, expand our research capacity in clinical areas including the important medical problems of human nutrition, population, and environment, the various diseases that affect the heart and blood vessels, cancer, diabetes, arthritis, and mental disorders, to name a few. Thus our plans include what might be called an Institute for the Study of Human Diseases.

I have presented to you very briefly some of the highlights of our history and how we came to be where we now are. I have also presented a brief and very conservative projection of where we must be ten years hence in order to fulfill our purpose. I would emphasize that to accomplish them will cost much more. These goals, which may sound grandiose, are, in my opinion, quite realistic and attainable.

Why are these goals practical? Is it because we suddenly find ourselves with a great natural-born leader who by his own strength and dedication can bring these things to pass? Most certainly not! These are practical goals because of our many blessings. We are blessed by being in, and a part of, this great State of Georgia; we are blessed with legislators and governing officials who really care about the health of the people of Georgia; we are blessed with the Board of Regents and its appointed officers who have demonstrated the willingness to assure greatness not merely with words but by deeds; we are blessed with alumni who passed through these portals and who have not forgotten their Alma Mater; we are blessed with the friendship of many fine citizens in Augusta and throughout the state; and we are blessed with a highly competent group of dedicated people whom we affectionately call the Medical College of Georgia family. And, finally, we are blessed daily through prayer, confident that what we are doing meets with the plans of God.

Thank you.

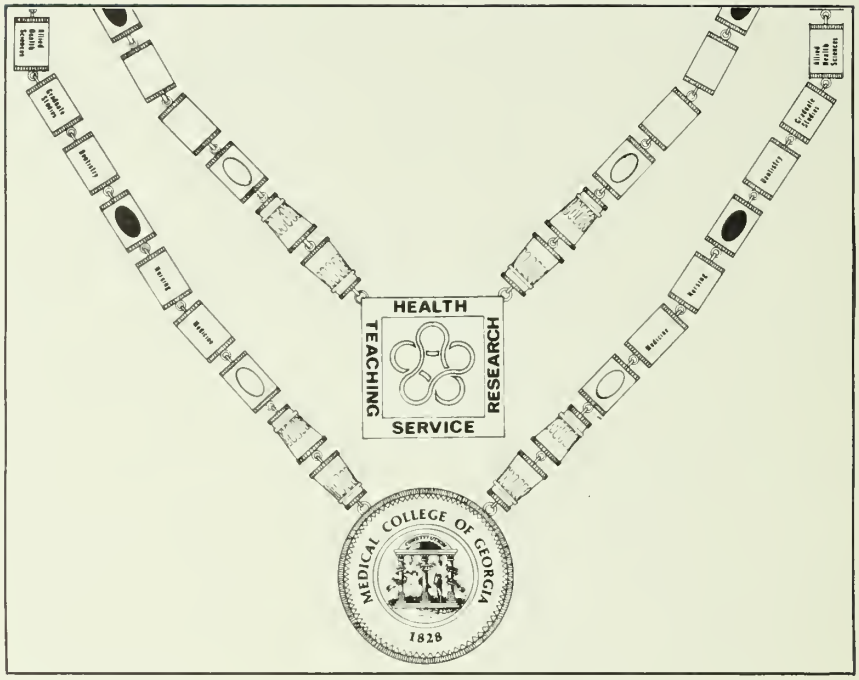
Symbol of Office

The newly created Presidential Medallion and Chain of Office were produced for original use in Inaugural Ceremonies for Dr. William H. Moretz.

The Medallion and the Chain of Office are symbolic of the authority invested in the Office of President by the Board of Regents of the University System of Georgia. Only the President of MCG may wear it and it will become a part of all official presidential functions at the College.

The First National Bank of Augusta and Dr. H. Gordon Davis Jr., '45, of Sylvester, Ga., made these official symbols possible. The designer was Robert W. Ebendorf, associate professor of art at State University College, New Platz, N. Y., and twice winner of the Tiffany Award. He is a former Georgian, serving on the faculty of the University of Georgia.

Combining the institution's historic seal and its contemporary identity symbol, the Medallion design is in gold and silver. The Chain is silver with stones in it representing the College's official colors. Etched onto the face of the chain links are the names of the five schools in the College — Medicine, Nursing, Dentistry, Graduate Studies and Allied Health Sciences. The names of the founders of the College are etched onto the reverse side of the links of the chain.



The calendar in this issue is a part of the continued effort on the part of MCG Today editors to improve communications concerning activities at the college and among alumni.

Alumni responses are encouraged, especially those which give information about important meetings or activities of MCG graduates.

The design is by artist Chris Cole, a graduate of the University of Georgia Art Department.

We hope you will pull this insert from the book and keep it as a handy reference.

Dean's Page

Thomas J. Zwemer
Associate Dean for Clinical Sciences
School of Dentistry

No relationship can endure, let alone prosper, except it redound to the mutual benefit of all the participants. It was this mutuality which probably prompted Charles Wilson to observe, "What is good for General Motors is good for the country." One can only speculate how fervently he might have wished he had put it, "What is good for the country is good for General Motors."

The University System of Georgia and the Medical College of Georgia have preeminently supported the School of Dentistry in facilities development, in faculty recruitment, in philosophical thrust, and in fiscal support since its inception in 1966. Having received the largess of the State of Georgia these past six years it is no longer impertinent to ask, "What has the School of Dentistry done for Georgia?" Is there a mutuality which can endure and prosper?

It has attracted $5,554,632.00 federal dollars for facility construction and capital improvements. It has attracted $551,500.00 for basic and clinical research. It has attracted $1,298,270.00 for educational and curricular design and innovation.

It has 170 dental students in residency, 58 of which will complete their professional education on or before September, 1973. It has recruited 75 full-time faculty with an average of two years of advanced education beyond the professional degree and eight years teaching experience.

It has provided national leadership in facility and curriculum design. Nine of its faculty serve as chairmen of national committees and/or as consultants to the Council on Dental Education. At a recently federally funded curriculum conference three of the eighteen participants were from the Medical College of Georgia.

It has added to the fund of biological and clinical knowledge through research and publication. Seven hundred and twenty-eight papers, articles, and abstracts have flowed from the articulate and prolific pens of the faculty over the past six years.

It has given statewide leadership in establishing six dental hygiene programs within units of the University System, thus providing an effective alternative to an outdated preceptor training system.

It has given added dimensions and enrichment to the interdisciplinary nature of contemporary health care delivery by the establishment of residency training programs in Oral Surgery, Orthodontics, and Children's Dentistry.

It has developed in alliance with the State Dental Association and Emory University, a statewide network of continuing education which includes active participation of the practicing dentist in current clinical procedures. Many of these programs make utilization of the facilities established for the dental hygiene programs in regional centers throughout the state.

It has cooperatively developed a dental assisting program with Augusta Technical School. This program provides career opportunities to 24 students per year as well as introducing well trained personnel to a critical segment of the job market.

It has served the dental health need of the region and state through direct patient care, consultation with practicing colleagues, and through the administration of funded clinical programs. 10,173 patient visits were recorded during the past year alone.

The school has set a fast pace in academic scholarship. The students have brought singular honor to the school by placing within the top quintile on the basic science portion of the National Board Examination. How is that for openers!

Yes, the School of Dentistry has come of age. Moreover, it is behaving as a producing member of the community which gave it birth and nurtured it through its developmental years. How sweet it is to become known for what we are doing instead of for what we hope to accomplish.

on campus

the faculty

James B. Mathews, PhD, has been named director of the new Division of Systems and Computer Services at the Medical College of Georgia.

The new division which was implemented July 1, will incorporate the Computer Center, Division of Hospital Research, and Division of Health Systems Engineering.

The new director received his bachelors and masters degrees in industrial engineering from the Georgia Institute of Technology, and his PhD in industrial and systems engineering from the same institution.

Robert C. Little, MD, had been appointed professor and chairman of the Department of Physiology. The new chairman comes to MCG from The Ohio State University where he has been professor and chairman of the Department of Physiology since 1964. He received his AB degree from Denison University, Granville, Ohio, and his MS and MD from Western Reserve University, Cleveland.

Edward Bresnick, PhD, is acting dean of the School of Graduate Studies, in addition to being professor and chairman of the Department of Cell and Molecular Biology. Dr. Bresnick came to MCG from Baylor College of Medicine. He is a magna cum laude graduate of St. Peter's College and earned the MS and PhD degrees at Fordham University.

Roy Witherington, MD, '53, is chief of the Urology Section in the Department of Surgery succeeding Dr. J. Robert Rinker who retired in June. Dr. Witherington has been on the MCG faculty since 1960 when he entered private practice in Augusta.

NOTED SURGEON VISITS — Dr. Michael E. DeBakey, president of the Baylor College School of Medicine and an internationally known surgeon, recently visited the MCG campus as guest of the Phi Delta Epsilon fraternity. Dr. DeBakey was also guest of the Georgia Railroad Bank and Trust Co. at a luncheon meeting on Jan. 19. Pictured (L-R) at the luncheon are Mr. Sherman Drawdy, chief executive officer of the bank, Dr. William H. Moretz, president of MCG, Dr. DeBakey being greeted by General Harley Moore, commanding general of Ft. Gordon, Dr. Robert A. Liebelt, provost of MCG and Dr. George A. Christenberry, president of Augusta College.

George W. Thurmond, MD, is acting chairman of the Department of Otolaryngology. He is on a part-time basis and has a private practice in Augusta. Dr. Thurmond is a graduate of Vanderbilt University and received his MD degree from Tulane University where he also served his residency.

Malcolm N. Luxenberg, MD, is chairman of the Department of Ophthalmology succeeding Robert P. Thomas, MD, who has returned to private practice but remains with MCG as a Clinical Professor. Dr. Luxenberg comes to MCG from a private practice in West Palm Beach, Fla., where he was also on the clinical faculty of the University of Miami School of Medicine. He earned the MD at Miami Univeristy and was formerly chief of ophthalmology at Iowa College of Medicine.

Virenda B. Mahesh, PhD, is chairman of the Department of Endocrinology. He came to MCG in 1959 and is an internationally recognized researcher in this field. Dr. Mahesh is a graduate of Patna University, India, has the MSc and PhD from Delhi University, India, and the doctor of philosophy degree from Oxford University, England.

Russell Moores, MD, is associate dean for curriculum for the School of Medicine. He is a widely published researcher in the field of hematology and received his undergraduate and MD degrees from the University of Arkansas.

Philip E. DeLorey, EdM, is associate dean for curriculum for the School of Nursing. He is completing work on his doctorate at the University of Georgia. Mr. DeLorey came to MCG from Tidewater Community College in Virginia where he was chairman of the Department of Nursing.

Robert L. Kinzer, DDS, is chairman of the Department of Restorative Dentistry. He came to MCG from Loma Linda (Calif.) School of Dentistry where he also earned his DDS.

Donald J. Welter, MD, is medical director of the Georgia War Veterans Nursing Home and a member of the faculty of the Department of Family Practice. He came to MCG after 18 years at Shell Lake (Wisc.) Clinic. He earned the MD at Marquette University School of Medicine.

Billy M. Pollard, DDS, is chairman of the Department of Dental Hygiene in the School of Allied Health Sciences. Dr. Pollard was in private practice in Jackson, Tenn., for 19 years prior to coming to MCG.

Thomas G. Basler, MS, is the new librarian. Mr. Basler comes to MCG from New York City where he was librarian at the New York Academy of Medicine and director of the Regional Medical Library of New York and Northern New Jersey. He earned his BEd from the University of Miami, his MS from Florida State University and has done graduate work at Emory and Columbia universities.

Dr. Alfred Jay Bollet, professor and chairman of the Department of Medicine at the Medical College of Georgia, has been installed as president of the Southern Society for Clinical Investigation.

president elect. . .

Dr. Preston Lea Wilds, professor of Obstetrics and Gynecology at the Medical College of Georgia, has been named president-elect of the Georgia State Obstetrical and Gynecological Society.

Hartford grant. . .

The John A. Hartford Foundation, Inc. of New York has awarded $112,730 to the Medical College of Georgia for study of new techniques for supporting patients in liver failure.

Announcement of the grant was made jointly by Harry B. George, president of the foundation, and MCG President, Dr. William H. Moretz.

Dr. George M. Abouna, assistant professor of surgery at MCG, will be principle investigator for the three-year project. Dr. Abouna said the funds will be applied to advancing liver support technique and to continuing development of what might be called a 'liver machine'.

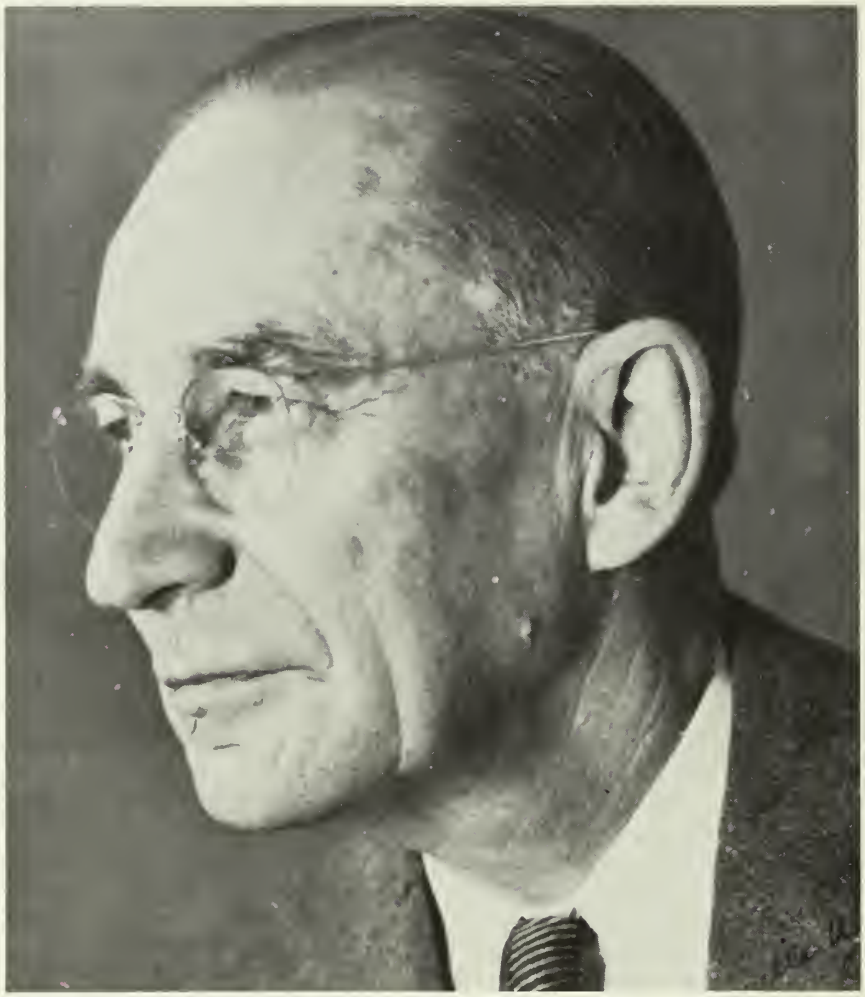
ALUMNI MEETING — Alumni in the Macon area met in regular regional session in January. Pictured (L-R) are Dr. Milford B. Hatcher of Macon, president of the MCG Foundation, Inc.; Dr. John Paul Jones of Macon; Dr. James B. Morton of Dublin; Dr. William H. Moretz, president of MCG and Dr. Joseph P. Bailey Jr., associate dean for clinical sciences at MCG.

First MCG President Dies



Dr. G. Lombard Kelly, first president of the Medical College of Georgia, died Oct. 24, 1972. He was a 1924 graduate of MCG and had been dean of the school from 1935 until 1950 when it received independent status from the University of Georgia. Dr. Kelly was president until his retirement in 1953 and was at his death President Emeritus of the school. Other living presidents of the college are Dr. Edgar R. Pund (1953-58), Dr. Harry B. O'Rear (1960-72) and Dr. William H. Moretz (1972-).

The following editorial from the Augusta Chronicle of October 25, 1972, is reprinted for the alumni who more than any others remember the accomplishments of Dr. Kelly.

Over a period of almost half a century, Dr. George Lombard Kelly made an imprint on the world of medicine which was broad, beneficent and significant.

In that same period of time, he gave leadership to the Medical College of Georgia which enabled it to emerge from a probationary status into which it had fallen to one of preeminence among the medical schools of America.

It was no easy task. It was one, rather, which brought into play the full measure of Lombard Kelly's abilities as an administrator, a medical man, a humanitarian — and a diplomat. It cast him in the role, not alone as dean of the school, but as a solicitor, both of goodwill and funds with which to maintain the institution in Augusta, and to restore its Class A rating.

The job was not his alone. Joining him were men of medicine, towers in their fields, who gave academic strength to the school. Yet it was the genius of Dr. Kelly that he could attract men of that stature, and it was to them that he gave the credit for his success.

Those, however, close to him were aware of the man and the work that he did. Of him, a colleague once wrote:

"The students found in him a friend to whom they could go for advice and help. He was a compassionate man who saw the side of goodness and kindness in every soul."

More importantly for the world of medicine, Dr. Kelly was a scientist. Studies he made with papanicolaou and tests he conducted were, as a colleague said, milestones in experimental endocrinology. He was an innovator in other fields, a courageous one, in fact. At a time when his confreres still regarded the subject as distasteful, Dr. Kelly lectured on "Sex" to medical student and physician alike. A "Sex Manual" which he wrote in the Thirties has been reprinted 23 times and has sold over a million copies.

With it all, Dr. Kelly was a human man, a lover of his family and of children everywhere. Little remembered, perhaps, is that he authored, years ago, a series of stories for children, naming them "Rabbit Town Tales," and introducing them to the public through publication in the Augusta Herald.

Now, death has come to this man of many talents, bringing to a close a life which started here in Augusta 82 years ago this month. It was a full life for him, and made rich the lives of those he touched.

Augusta, and the Nation, will miss Dr. Kelly, whose gentleness, spirit of adventure, courage, faith in others and endurance to overcome obstacles that beset his path were characteristics that made him stand out as scholar, friend and healer. □

The Medical College of Georgia Foundation, Inc. is receiving contributions to the Dr. G. Lombard Kelly Memorial Fund.

Medicine

1920 - 29

Frederick H. Oetjen, '20, of Jacksonville, Fla. retired in 1971. His address in Jacksonville, Fla. is 3404 St. John's Ave., 32205. **Alexander Kaye**, '21, P. O. Box 250 Old Westbury, N. Y. retired in May of 1971. Dr. Kaye was formerly associate professor of surgery, N. Y. Medical College and on the staff of the Flowers-Fifth Ave. Hospital until 1936; after that he was director of surgery at the Physicians Hospital in Jackson Heights, N. Y. from 1936 to 1971. Dr. Kaye is a fellow of the American College of Surgeons as well as being a diplomate of the American Board of Abdominal Surgery. **Ferdinand Richard**, '21, is retired and he lives in Jacksonville, Fla. He is past president of the Duval County Medical Society, president of the Florida State Ob & Gyn and a former chief of the Ob & Gyn staff of St. Luke's Hospital in Jacksonville. **Earl L. Warren**, '25, Glen Rock, N. J. is retired. Prior to his retirement he served as president of the Paterson Rotary Club and the Chamber of Commerce. He was on the Visiting Home Section of the Paterson Hospital Staff and director of Radiology in addition to his private practice of radiology. **W. H. Long**, '27, is in Pharr, Tex. **Walter P. Kirkland**, '29, has semi-retired and lives in his home town of Pearson.

1930 - 39

Eugene B. Wilson, '30, formerly of Albany, N. Y. has returned to Augusta. **Mary Kate MacMillan-Hires**, 31, formerly of Atlanta has retired and settled in Blackshear. She reports during the past year she visited New Zealand, Australia, Fiji, and Hawaii. **Paul P. Hearn**, '36, has practiced otolarynology since 1951. **Leopold A. Schneider**, '36, of Ninety Six, S. C., has been chief of staff on the Self Memorial Hospital in Greenwood, S. C. **Z. S. Sikes**, '38, Macon is medical director and president of the Board of the College Street Hospital. The College Street Hospital is a 55 bed private psychiatric hospital. Besides his professional work, Sweeney is known throughout middle Georgia as an authority on and a grower of beautiful orchids. **Lynn M. Huie**, '38, Monroe is practicing general medicine in that area. **Joseph E. Warren**, '38, Lynchburg, Va., has had to limit his practice to gynecology since 1972. This limitation due to surgery to the right hip in 1963 and then to a total hip replacement in 1971 in Boston, Mass. **Bruce Swain**, '39, Cornelia, after having been in public health work for many years, is now enjoying the practice of general medicine.

1940 - 45

John P. Bond, '40, Dunnellon, Fla., is doing general practice and some public health work. **Robert E. Peck**, '40, Syosset, N. Y., is director of psychiatry for the Syosset Hospital, a consultant for Nassau County Medical Center, president of Long Island Psychiatric Research Foundation and president of Computer Paramedics, Inc. **Donald R. McRae, Jr.**, '41, Augusta, reports his son, John R. McRae, graduated from Duke Medical School in 1971 and is interning at the Duke University Hospital. Another son, Donald R., III, is a senior medical student at the Medical College of Georgia. **Clyde M. Collins**, '42, Jacksonville, Fla. who has specialized in surgery, is editor of the Journal of the Florida Medical Association this year **Curtis M. Phillips**, '43, Jacksonville, Fla., diplomate of the American Board of Pathology of the American Board of Surgery, is chief of surgery at the Baptist Memorial Hospital, and civilian consultant for the Naval Tumor Clinic. **H. Calvin Jackson**, '45, Manchester, was re-elected chairman of the State Medical Education Board of Georgia at the annual meeting in Atlanta, July, 1972. Dr. Jackson introduced Dan Cabaniss, '55, as medical director of the Medical Center in Columbus, during the State Medical Education Board annual luncheon at the Georgia State University. Dr. Cabaniss addressed the 55 medical students who are seeking scholarships from the Medical Education Board.

1946 - 49

H. A. Foster, '46, Griffin, is president of the Medical Staff of the Griffin-Spalding County Hospital of Griffin. **William H. Houston**, '47, of the Marshall Taylor Doctors Building, Jacksonville, Fla., is enjoying the practice of ophthalmology in Jacksonville. **Thomas C. Nolan**, '48, Montgomery, Ala., is engaged in the practice of pediatrics. **Robert R. Keim, Jr.**, '49, Sacramento, Calif., retired as a colonel in the Medical Corps in October of 1971. He was chief of the Department of Psychiatry and director of the Psychiatric Resident training program at Letterman General Hospital in San Francisco from 1967 to 1971. He is now staff psychiatist at the Permanente Medical Group, Sacramento, Calif. **Thomas H. Lamson**, '49, Washington, D. C., is deputy commandant and director of the Educational Program of the Walter Reed Army Institute of Research. Tom and Ann's son graduated from Sewanee in 1972 and is now with the Peace Corps in

Korea. One daughter is a senior at Sewanee and another daughter is a sophomore at Emory. The third daughter is a sophomore in high school. **Don W. Schmidt**, '49, of Cedartown had a very busy year carrying out duties as a Director of Lions International. He and Elaine traveled to the Orient last Spring and spent two weeks in France during October.

1950 - 52

James D. Bozeman, '50, is practicing anesthesiology in Orlando, Fla. **Robert Mainor**, '51, of Smyrna was recently certified by the American Board of Family Practice. **A. G. Oliver**, '51, is doing general practice in Abbeville, S. C. **Zeb L. Burrell, Jr.**, '52, has given up his general practice in Milledgeville and is now working at the Athens General Hospital in Athens. **W. Knox Fitzpatrick, Jr.**, '52, of Salt Lake City, Utah, has been named speaker of the House of Delegates, Utah State Medical Association and delegate to the American Medical Association. **Herbert R. Frost**, '52, is doing general practice in Swainsboro, in the Professional Building. **Robert J. Moye**, '52, is also in general practice in Swainsboro. Bob's son, Robert J. Jr., is now a senior medical student at MCG. **J. Roy Rowland**, '52, Dublin, recently became a Diplomate with the American Board of Family Practice. **Goodwin G. Tick**, '52, of Covington is engaged in general practice. **Harry E. Burkett**, '52, retired after 20 years in the Army, is on the staff of Scott & White Hospital in Temple, Tex., practicing his speciality of anesthesiology.

1953-54

Daniel S. deLaPenha, '53, Hollywood, Fla., who is certified by the American Board of Anesthesiology is still enjoying his practice in that beautiful Florida city. **William E. McDavid, Jr.**, '53, Riverdale can now boast of another generation carrying on at MCG. His oldest son, Bob, is a member of the freshman class. **T. N. Davis**, '53, Irwington, is in general practice. **Raymond W. Pickering**, '53, a former member of the MCG faculty is now the Southern California Permanente Medical Group in Ontario, Calif. **Jack H. Raulston**, '53, Boynton Beach, Fla., says his general practice may have also been his "Fountain of Youth". He wishes there were more G. P.'s in his area. **Roy Witherington**, '53, Augusta, has recently been appointed professor and chairman of the Department of Urology at the Medical College of Georgia. **Alfred L. Davis**, '54, Blackshear, has returned to Georgia to practice pediatrics after two tours of duty as a medical missionary in Howloon, Hong Kong. He and his wife were recently featured in the Blackshear newspaper. He reports its great to be in an area where there are several of his classmates practicing. **George T. Mims**, '54, is in Marietta after returning to MCG to pursue his residency in general surgery. **Diskin G. Morgan**, '54, is now practicing general medicine in Brunswick at 3012 Shrine Rd.

1955 - 56

Richard L. Nutt, '55, says there's nothing new to report. "Pop," as he is known to his friends, has done a magnificant job serving as chairman for our regional alumni dinners the past two years held in Valdosta. Dr. and Mrs. Nutt's eldest son, Richard, Jr., class of '69, after his residency at Jackson Memorial Hospital in Miami, Fla., is now in private practice of anesthesiology at Baptist Memorial Hospital, Jacksonville, Fla. Another son, James, is a member of the Junior class at MCG. **Nelson S. Carswell, Jr.**, '56, of 7405 Industrial Highway, Macon, is a new Diplomate of the Board of Family Practice. He was named a charter member in 1970. He, his wife and four children are enjoying their life in Central Georgia and he reports having moved into a new office building. **Bernard Portman**, '56, is practicing pediatrics in Savannah.

1957

Jorge Alea, Lake Worth, Fla., has been appointed chief of medicine at the newly erected Doctor's Hospital in Lake Worth. **Edmund A. Krekorian**, colonel in the Army Medical Corps is chief of Otolaryngology Service at Fitzsimmons General Hospital in Denver. Recently he has acted as moderator of a panel on larynx and sinus and a symposium of head and neck malignancies at Fitzsimmons. He is a member of the panel on tumors of the nasal cavities for the 1972 Clinical Congress for the American College of Surgeons and is program chairman for the Colorado Otolaryngological Society. He holds an appointment as assistant professor of surgery in otolaryngology at the University of Colorado School of Medicine and has been reappointed a member of the National Academy of Science. **Robert D. Starling** is in general practice in Donalsonville. **Lynn L. Ogden, II**, formerly pathologist at St. Joseph's Hospital in Louisville, Ky. is now associated with the Jewish Hospital at 217 E. Chestnut St., Louisville.

1958

Garland Eugene Kinard is practicing general medicine in Rossville. **David S. Perling**, of Chamblee is certified in internal medicine and is practicing his specialty in that city. He, his wife and two children live in Atlanta.

1959

Reginald M. Davis, of 9103 Bay Cove Lane, Jacksonville, Fla., a Navy Commander is now chief of the Ob & Gyn service at the naval hospital in Jacksonville. **E. Walter Hood** practices at the North Side Medical Center, 275 Carpenter Drive, Atlanta. **Joseph F. Rice** returned from South Vietnam in July after serving three months with the American Medical Association as a volunteer physician. His address is 436 Lincoln St., Savannah. **Willard A. Snyder** is practicing in Brunswick.

1960

Thomas S. Branigan, of Amherst, N. Y. is in the practice of internal medicine. **James E. Burnes**, Madison, Tenn., is in the practice of ophthalmology and is an instructor at Vanderbilt University. **James B. Chandler, Jr.** is practicing gastroenterology in Temple, Tex., and is on the staff of the Scott & White Clinic. **R. Russell Martin**, of Houston, Tex. is associated with the Department of Medicine at Baylor College of Medicine. A new NIH training grant in infectious diseases has been awarded to his department and he will be administrator for the grant and coordinator of the training program. **Richard H. O'Dillon**, Cincinnati, Ohio, is a group director in product development, clinical research of Merrell National Laboratories in in Cincinnati. He is one of our few alumni who has pursued industrial medicine.

1961

James B. Knowles, formerly of Minneapolis, Minn., has assumed the position of Medical Director of the Roger C. Peace Institute, a rehabilitive medicine installation, in Greenville, S. C. **W. Harold Mixon** has joined **Jack Evans**, '62, in Spartanburg, S. C., in the practice of urology. **Charles G. Edwards** practices pediatrics in West Palm Beach, Fla., and is associated with another MCG graduate, **C. Jennings Derrick**, '33.

1962

H. **Felton Coffer** finished his residency four years ago in ophthalmology at the Letterman General Hospital in San Francisco, Calif., and is now practicing in Panama City, Fla. He was Board certified in 1970. **Thomas W. Price,** Montezuma, is in private practice of medicine at the Riverside Hospital. The Price's have three children, Elizabeth, 8, Thomas, 5, and William, 3. **Gerald B. Muller** is in Thomasville. C. **Norton Sims**, Fort Myers, Fla., practices ophthalmology in that city. He and his wife and their two sons, Clark and James Graham all enjoy scuba diving, sailing, tennis and fishing.

1963

Lynn Ferrell is enjoying general practice in Sparta. He is associated with **George F. Green**, '51. His wife, Joyce, is a '64 graduate of the MCG School of Nursing and is a school nurse supervisor in Sparta. They have two sons, Ricky and Ronny and a new addition after 11 years, a daughter Robin Lynn. **Robert A. Payne** has returned to his native, Athens, Ga., in the practice of urology. Previously he had practiced in Sacramento, Calif., and at the University of Calif. **Steven W. Edmondson**, of Dunwoody has moved his office for the practice of psychiatry, sharing this practice with **Olen I Freeman**, '57. **Eugene C. Jarrett, III**, 939 Shetland Court, Mount Pleasant, S. C., is now on the staff at the Medical University Hospital, Charleston, S. C., practicing thoracic and cardiovascular surgery. **Louie H. Griffin** has completed two years at Tripler Army Hospital, Honolulu, Hawaii, and has returned to MCG as an assistant professor in the Department of Surgery. He is the son of the late **Louie H. Grinnin**, '37, Claxton.

1964

James W. McCord has his office at 1500 John's Road, Augusta. **W. Jack Thompson**, Gainesville, announces the association of Dr. Alan Adderson, a fellow in American College of Ob & Gyn and a graduate of Duke University School of Medicine who interned at the Medical College of Georgia, as his associate in Ob & Gyn. **G. T. Giesler, Jr.**, 424 Windsor Dr., Birmingham, Ala., is now a second year medical resident at the University of Alabama Medical Center and will become a fellow in pulmonary medicine in '73.

1965

C. V. Hancock, Jr., and **James R. Hattaway** have opened the Albany Urology Clinic at 1108 North Jefferson Street, Albany. **Johnny T. Deen** has finished his first year in private practice of ophthalmology in Thomaston Upson Eye Clinic. He and his wife, the former Betty Hopkins of Augusta have one son, Kenneth Murray Deen, age two. **Ray Groover, Jr.** has completed a residency in radiology at the Wilford Hall U. S. Air Force Hospital in San Antonio, Tex., and has been appointed to the faculty of Harvard Medical School and to the staff of Peter Bent Brigham Hospital in the Hypertensive Unit of the Department of Medicine. It is good to welcome **Jack K. Tippens** back to Augusta. He has been assigned to Fort Gordon General Hospital as assistant chief of orthopedic surgery. **C. S. Tuten** has completed his residency in ophthalmology and is on the staff of the Naval Hospital in Portsmouth, Va. He and his wife, Margaret, have a three-year-old daughter, Carolyn.

1966

William H. Hayes, of Columbus was certified by the American Board of Pathology in November of 1971. He is president of the Columbus Pathology Service and Research Professional Corp. Also, he is director of laboratories for the Medical Center in Columbus. **C. Neil Kelly**, Stone Mountain, is a fellow in pulmonary medicine at Emory University. He is planning in July of 1973 to enter private practice of Medicine with the North East Georgia Diagnostic Clinics in Gainesville. **John N. Fillingim**, Savannah, is in general practice and surgery in Savannah. **Stanley J. Self,** Rome, is practicing dermatology in Rome after serving two years in the Army at Ft. Benning. He and his wife, Patricia, have three sons, Gregory 4; Neal 2; and Bill, 2 months. **Robinson (Robin) W. Schilling, Jr.** is a third year resident in otolaryngology and Maxillo-facial surgery in Iowa City, Iowa. **Arthur S. Booth, Jr.** and his wife, Lynda, are in Atlanta where he is practicing general and peripheral vascular surgery, and is associated with Dr. Ed White. **Mickey Crouch** is now the Medical College of Georgia coordinator for the Regional Hospital in Augusta and chief of the admissions unit at the Regional.

1967

Jack Butterworth of Bristol, Tenn., is practicing urology. **Al E. Jones** is a third year resident in urology at the Wilford Hall USAF Medical Center in San Antonio, Tex. **Robert T. Anderson, Jr.** is a third year resident in diagnostic radiology with Emory University Clinic and its affiliated hospitals in Atlanta. **Murray A. Freedman**, Augusta, is stationed at Ft. Gordon Military Hospital in the Department of Ob & Gyn and is on the part-time teaching faculty at MCG. **Sidney A. Bell,** Roanoke, Va., is a third year orthopedic surgery resident at the University of Va. Hospital in Charlottesville. **W. Lamar Cousins**, Birmingham, Ala., is doing a rheumatology fellowship at the University of Alabama Hospitals. **Matthew T. Howard**, of Augusta is certified in pediatrics. **Robert M. Kelleher** is stationed at Ft. Gordon Hospital in the Department of Dermatology. He completed his residency in dermatology in 1971 at Brooke General Hospital in San Antonio, Tex. **Ben H. Moye,** Millington, Tenn. is serving with the Navy as an ophthalmologist. His service ends in June of 1973. **Kenneth W. Reeves**, Metairie, has completed a residency in internal medicine and is assistant chief of medicine at a U. S. Public Health Hospital in New Orleans. The Reeves have two children, Gretchen and Eric. **Harvey S. Wages**, Dalton, is practicing ob-gyn with **James R. Gregory**, '66.

1968

Sandra N. Freedman is a radiologist at the V. A. Hospital in Augusta and holds a part-time teaching position at the Talmadge Hospital. **John B. Hill, Jr.**, Charlotte, N. C., is a second year resident at Charlotte Memorial Hospital. **Frederick C. House,** Rockville, Md., formerly, chief of the Allergy Clinic at Fort Gordon, transfered to Walter Reed Allergy Clinic in Washington, D. C., for a fellowship in allergy and immunology. **Joseph F. Johnston** is affiliated with the Department of Anesthesiology at the MCG. **Fred A. Trest** is beginning his second year of residency in psychiatry at the MCG. **M. Gary Carter**, Rochester, Minn., and **Larry Willis** are second year residents in ophthalmology at the Mayo Clinic. After completion of training, Larry plans to go to Nigeria and Gary to Milledgeville, Ga., for an additional 3 months of surgical training. **Ralph Joseph DiFiore** is a major in the Army Medical Corp and is stationed at Letterman General Hospital, San Francisco, as an orthopedic surgeon. **Gwynne D. Floyd,** of Aurora, Colo., is in his first year of residency of a two year training program in cardiology as a fellow at Fitzsimmons Hospital in Colorado. **John B. Hardman**, Atlanta, is in his second year as a Fellow in child psychiatry at Emory University. **Hyman M. Kaplan**, Wheaton, Md., is completing his second fellowship in allergy

and immunology at Walter Reed Army Hospital in Washington, D. C. **William D. King,** Orange Park, Fla., is a resident in Ob & Gyn at University Hospital, Jacksonville, Fla., as a first year resident. He previously served as flight surgeon at Moody Air Force Base, Ga., from September of '69 to '71. **Charles B. May** will start an Ob & Gyn residency at MCG after completing a year of general surgery at the Medical Center of Central Georgia in Macon. **Hillery R. Newland,** Tacoma General Hospital, Tacoma, Wash., will be assigned to the pathology service at the Army Hospital at Fort Carson, Colo., after December of 1972.

1969

Hugh O. Hodges has joined Hezekiah Heath and George Heath in the practice of Family medicine in Waycross. **Jabez O. Marshall,** Galveston, is in his second year as an Ob & Gyn resident at the John Sealy Hospital University, Texas Medical Branch, Galveston. **Donald E. Baxter** is third year resident in orthopedic surgery at Hermann Hospital in Houston, Tex. **Walter W. Simpson,** Perry, is in family practice in Perry and is associated with Wayne Hulsey and Hoyt Crump both of the Class of 1971. **Willis E. Lanier** is serving as a Navy flight surgeon. He recently returned from Viet Nam where he was on the Carrier USS Coral Sea. He plans to enter an ob-gyn residency at Grady Hospital in July '73. **Alfred V. Dell'Ario.,** Topeka, Kan., is a fellow in psychiatry of the Menniger Foundation in Topeka. He and his wife have two children, Nicole, 4, and Jason, 2. **Barry L. Thompson,** North Augusta, S. C., was recently discharged from the Army and is beginning his first year dermatology residency at MCG. **James C. Pope,** Memphis, is in his third year of surgery residency at the City of Memphis Hospital. His wife, Susan, School of Nursing, '68, is charge nurse of the Medicine Clinic of the City of Memphis Hospital. **William L. Wilkes** has completed his residency in otolaryngology and is doing a fellowship in otology at the Medical College of Virginia.

1970

Danny E. Askew, Fort Deposit, Md., is stationed at the Bainbridge Naval Base. He and his wife, Lynda, have two children, Todd, 2, and Leigh, four months. **Bowen Asserson,** Oakland, Calif., is a first year resident at the Naval Hospital in Oakland. **Bruce G. Bateman** is a second year resident in ob-gyn at the University of Virginia Hospital. **James T. Bowles,** son of Dr. Lester L. Bowles, professor emeritus of micro-anatomy at MCG, is a first year resident in otolaryngology at the Medical University of South Carolina, Charleston. His wife, Margaret, '69, Medical Technology, is working at the Medical University Hospital. **Thomas H. Cawthon** is a second year resident in otolaryngology at Tulane University Medical School, New Orleans. **Arthur G. Kelly** has been appointed chief of dispensary services at McCoy Air Force Base, Orlando, Fla. **Jack Ronald Newton** is a captain with the Army Medical Corp and is stationed at Brooke General Hospital, Fort Sam Houston, Tex., where he is a second year resident in ob-gyn. **Fred T. Owens** is a second year resident in internal medicine at Vanderbilt University Hospital in Nashville, Tenn. **William D. Daniel,** Kensington, Md., is in his second year residency in ob-gyn at the Naval Hospital in Bethesda. **William C. Kitchens, Jr.,** son of **William C. Kitchens, Sr.,** '43, of Athens, is a second year resident in radiology at MCG. **Joseph Larry Jackson,** son of **Joseph M. Jackson,** '43, of Folkston, is a third year resident in the Family Practice Program at Greenville, S. C., General Hospital. **Jesse D. Hester** reports Willford Hall Air Force Medical Center, San Antonio, Tex., is fortunate to have four 1971 graduates as residents: **James Rogers,** pediatrics; **Cleve Collins,** medicine, and **Edwin Steves,** radiology.

1971

John W. Hurst, son of **J. Willis Hurst,** '44, internationally known cardiologist of Atlanta is following in his father's footsteps. He is now in his first year residency in internal medicine at Parkland Memorial Hospital in Dallas.

1972

Emmett R. Bishop, Jr., 1063-F Donning Court, Towson, Md. 21204. **Libby** and **Rodney Blanton** are interning at the Medical Center in Columbus, Ga., and announced the birth of their son, Jonathan Drew Blanton, on February 16, 1972. **J. W. Byrd,** 1330-6 Ephesus Church Rd., Chapel Hill, N. C., is doing a straight internship in pathology. **W. O. Cornwell** is residing at 976 Farwell Dr., Columbus, 31906. **David A. Driggers** is stationed at Andrews Air Force Base, Washington, D. C., P. O. Box 2509, Malcolm Grow Hospital. **William F. Garrard's** address is 67 Noe St., San Francisco, Calif. 94114. **J. Laird Griffin** resides at 1003 Adrian St., Augusta 30904. **Wallace E.**

Class Reunions

1943

The class of March, 1943, of MCG will hold its 30th class reunion Thursday, May 10, at the Augusta Country Club. This will come during the annual meeting of the Medical Association of Georgia in Augusta. The social hour is set to begin at 7 p.m. and dinner will be at 8:30 p.m. To register, please send $12.50 to Dr. Robert G. Ellison, chief, thoracic surgery, Medical College of Georgia. The class of 1943 (University of Georgia School of Medicine) is unique in MCG history since it was one of two classes graduated during a single year.

1954

The class of 1954 will have its own socal hour prior to joining the total MCG Medical Alumni for dinner on the evening of May 12. The social hour will be at 5:30 p. m. at the Richmond Hotel, Augusta, and dinner will be at 8 p.m. with the class of 1954 having a table reserved in order to be seated as a group. Co-chairmen are Drs. Herman Peskin and Henry D. Scoggins.

1963

The class of 1963 reunion on May 12 will begin with a social hour at 7 p. m. in the Thunderbird Inn and followed by dinner at 8 p.m. Dress will be informal. Persons interested should contact Dr. Charles Linder at the Medical College of Georgia, Children and Youth Clinic.

Dr. and Mrs. J. Render Turner of LaGrange have made a $10,000 gift to the endowment fund campaign of the Medical College through the Medical College of Georgia Foundation, Inc. Dr. Turner is a 1944 graduate of MCG.

Beverly B. Sanders, Jr., M. D., '60, has made a $500 gift to the Department of Dermatology at MCG, announces J. Graham Smith, Jr., M. D., professor and chairman of the department.

Dr. Smith said the gift will be used to purchase additional needed equipment to "make our cryosurgery equipment operative." "We are appreciative of this gift which represents a real addition to our therapeutic armamentarium as well as being badly needed for our training program," Dr. Smith said.

Henry Budd's will said in part,
"...if my son, Edward,
should ever wear a moustache,
the bequest in his
favor shall be void."

You can put restrictions on bequests to MCG Foundation, Inc., but we hope you won't make them as limiting as Henry Budd's. For further information on providing for MCG in your will or through a life income trust or annuity, contact:
